

HYBRID BULL

The American Bully Registry (ABR) Hybrid Bull is a breed implemented in effort to protect the existing Bull Breeds as well as give breeders, an avenue to mix and do so without repercussions, further more doing so without having to lie about their creations lineage. We understand that the American Bully and its varieties have been heavily influenced by other breeds and vice versa, but we feel that even though all breeds were created by some form of mixing, we as a registry need to do what we can to protect the stud books going forward

How it Works

When a breeder decides to mix, as in any breed we encourage that both sire and dam are chosen from quality stock. We (ABR) will document each breeding and register as such, be it Bulldog sire or French bulldog dam. All dogs will be given ABR Registration under the Hybrid Bull name. Once a Hybrid Bull has been created and established, it CANNOT be bred back to any other breed and registered as anything other than a Hybrid Bull.

This program is for experienced breeders and we ask that all those who choose to breed Hybrid Bulls, do so with the animals Health and wellbeing as first priority over all. Both dog owners must be in agreement, that each of the dogs and its breed are to be bred and papered as such (Hybrid Bull). There are no limitations to which of the bull breeds are used but we ask that the size and females structure be taken into consideration when breeding dogs of different heights and builds.

Showing Hybrid Bulls

Showing of Hybrid Bulls will be available at ABR conformation shows under the Breeder Recognition class. This class is solely a class in its own that acknowledges the breeders abilities and creations. Classes will be broken into age groups as in all the other breeds. All dogs regardless of breed used to create a Hybrid Bull, will be judged under the basic standards of a canine.

Judging of Hybrid Bulls will be done so by ABR Judges at the time of conformation shows. Each dog will be judged and assessed by appearance, movement and temperament. Since the breeds are of bull breed decent, temperament is a major factor in Hybrid Bulls. No points will be given to the dogs shown, as stated this is a breeder's recognition class, so breeders will be awarded single points at the time of wins. All winners of each age group will go on to compete in the best of Breeders Recognition class and the owner will be awarded his/her point for showing.

Breeder Etiquette

Remember the overall health and wellbeing of the dogs must be considered when breeding Hybrid Bulls. Entrusting breeders with the ability to mix and register dogs within ABR is a major step in protecting future lineages and stud books. Being that this has the potential to taint just as much as help other breeds, the registry will also implement random DNA and Health testing of ALL dogs registered under the owner's name.

If ABR finds a breeder to have falsified documentation at the time of testing, immediate action will be taken and the breeder will be banned from registering under the American Bully Registry (ABR). In Breeding Hybrid Bulls there is no need to lie to the registry, customers and any other parties involved.
